EMPLOYMENT

Red Hat, Inc.

Open-source Linux Software Company, Westford, MA 07/20/2010 – Present

Interaction Designer for User Experience within Engineering Division

- User Experience / Interaction designer for desktop, application and web-based user interfaces
- Extensive data modeling to create workable solutions for project needs, including high level mapping, review of behavioral expectations, and prototyping
- Creating business cases for new products and products still in their beginning stages
- Wireframing for site maps, application screens, demos and presentations
- Working closely with Engineering to define the scope of projects and release schedules
- Major projects include a desktop software subscription manager, a virtual computer management tool to allocate machine resources in a cloud format, and a scheduling device for use in complex middleware resource planning.
- Working with highly specialized software technologies to deliver solutions that any level user can easily comprehend and apply
- Open-source company where designs are scrutinized by the user community; this requires diplomacy, listening to users' concerns and addressing those concerns directly in designs.

Monster Worldwide (Monster.com)

International Employment Website, Cambridge, MA 06/10/2008 – Present
